# WIND POWER GENERATION SYSTEM

Anyteksys founded Energy Department in 2009 for R&D and business on wind power generation. Since we started our business on wind power generation, we have developed, produced and installed wind power generatros from 3kW up to 20kW. In comparison with our competitors, our system operates without noise and performs stable efficiency. We also develop generator and PCS which are customizable to the hybrid system composed of photovoltaic and ESS.

## Product Installation

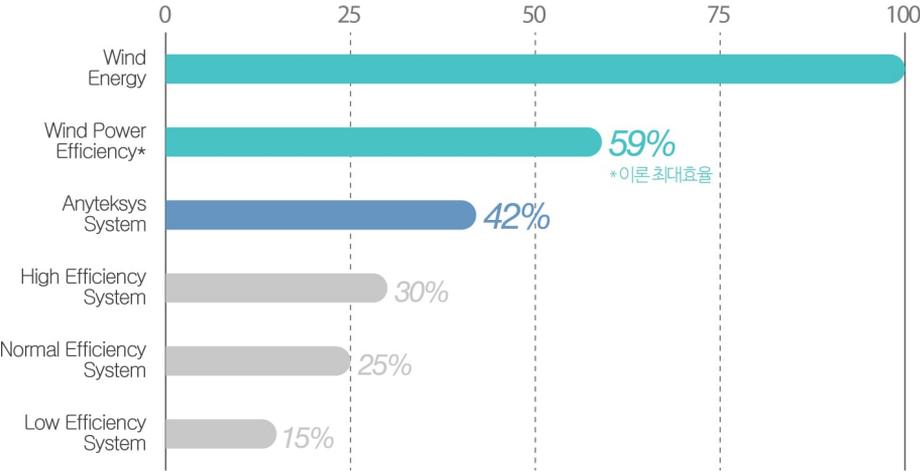

## Hybrid Streetlight

Generates power from hybrid system - wind(300W) & photovoltaic(200W)  
 Stores the power in battery and operates LED streetlight at night  
 Composed of wind turbine, solar cell, LED light, hybrid pole, controller and battery

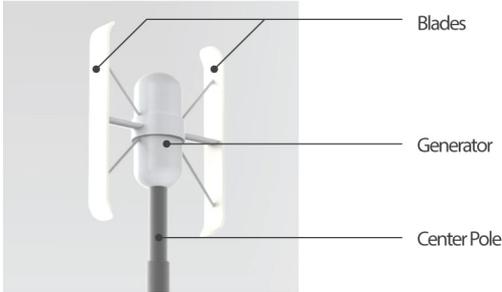

Model		AWT300H
Generation Type		Wind & Photovoltaic Hybrid
Wind Generator	Max. Output	300 W
	Max. Wind Speed	12 m/s
Photovoltaic Generator	Max. Output	200 W
	Installation Angle	15 ° ~45 °
LED Light	Qty. of Light	4800 lm
	Operation	From sunset to sunrise
Battery	Capacity	DC24V (DC 12V x 2 serial battery)
Installation Environment	Temperature	-15°C ~40°C
	Durable Wind Speed	60 m/s (JIL 1003)
	Installation Type	Foundation Plate

## Anyteksys System Efficiency

**High-efficient Wind Generation**  
 Theoretical maximum efficiency of wind energy is 59% compared to natural wind. Average efficiency of competitor products is 25% (max. 30%). Compared to this, Anyteksys system, compared to this, performs up to 42% of high efficiency.

## Blade Feature

Winglet shaped blade  
 Innovative blade with styrofoam material  
 New technology that enables wind storage and re-use  
 Performs higher efficiency with extended blades
